Dimensions of BLK02E in Operational and Transport Position	Length	Width	Height
O P E R A T I O N	23,550 mm	15,000 mm	5,860 mm
TRANSPORTATION	20,350 mm	4,400 mm	4,700 mm

<sup>\*\*</sup> WEIGHT: Approx. 68 t

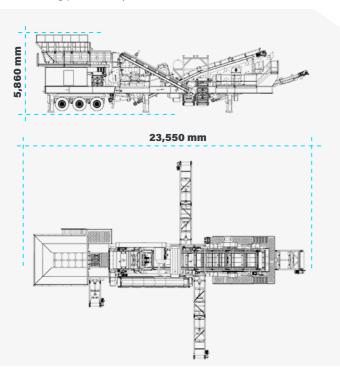

**Borataş Portable Impact Crusher and Vibrating Screen BLK02-E** offers a compact and portable solution for crushing and screening operations. By combining an impact crusher and a high-performance vibrating screen on a single chassis, it allows for efficient material processing and precise product sizing for both primary and secondary crushing.

# **Key Features and Differentiators**

1 Integration of Impact Crusher and Vibrating Screen Borataş provides a cost-effective solution by integrating the impact crusher and vibrating screen on a single chassis, saving space. This integration ensures efficient material flow, eliminates the need for additional conveyors, reduces operational complexity, and enhances overall efficiency.

#### 2 Compact and Portable Design

With its wheel-mounted design, it offers excellent portability, making it ideal for various job sites. Its compact structure ensures easy transportation and quick setup, reducing downtime and increasing productivity.

3 Flexible Crushing and Screening Capabilities
The impact crusher can handle a wide range of materials,
performing both primary and secondary crushing tasks. The highperformance vibrating screen effectively separates the desired
product sizes, delivering precise and consistent end products for
various applications.

# 4 User-Friendly Operation

The Borataş BLK02-E prioritizes user convenience. The machine is equipped with intuitive controls and a user-friendly interface, simplifying operation and allowing for easy adjustments. Additionally, accessibility for maintenance and servicing has been optimized, minimizing downtime and ensuring smooth operation.

### 5 Enhanced Safety Features

The BLK02-E includes advanced safety features to protect operators and equipment. It is equipped with emergency stop buttons, safety guards, and comprehensive safety systems to ensure a secure working environment during crushing and screening operations.

#### 6 Impact Crusher

After the welding process is completed, the crusher rotor undergoes a stress relief procedure. The crusher side liners are reinforced with 16-18% manganese steel cast linings to enhance durability and are easily replaceable. The impact plates are securely mounted with bolts. The two-part movable body allows for easy replacement of the impact plates. Adjusting the crusher gap is simplified with a hydraulic system. Safety is enhanced by the addition of springs to the upper and lower impact plates.

# PORTABLE IMPACT CRUSHER & SCREEN

Borataş® Wheel-mounted Impact Crusher & Vibrating Screen BLK 02-E offers an excellent solution for both crushing and screening on a single chassis, ideal for Recycling, Mining, and Aggregate production applications.

To meet customers' varying demands for flexibility and versatility in high-capacity crushing and screening, BLK wheeled impact crushers are available in standard or customizable versions.

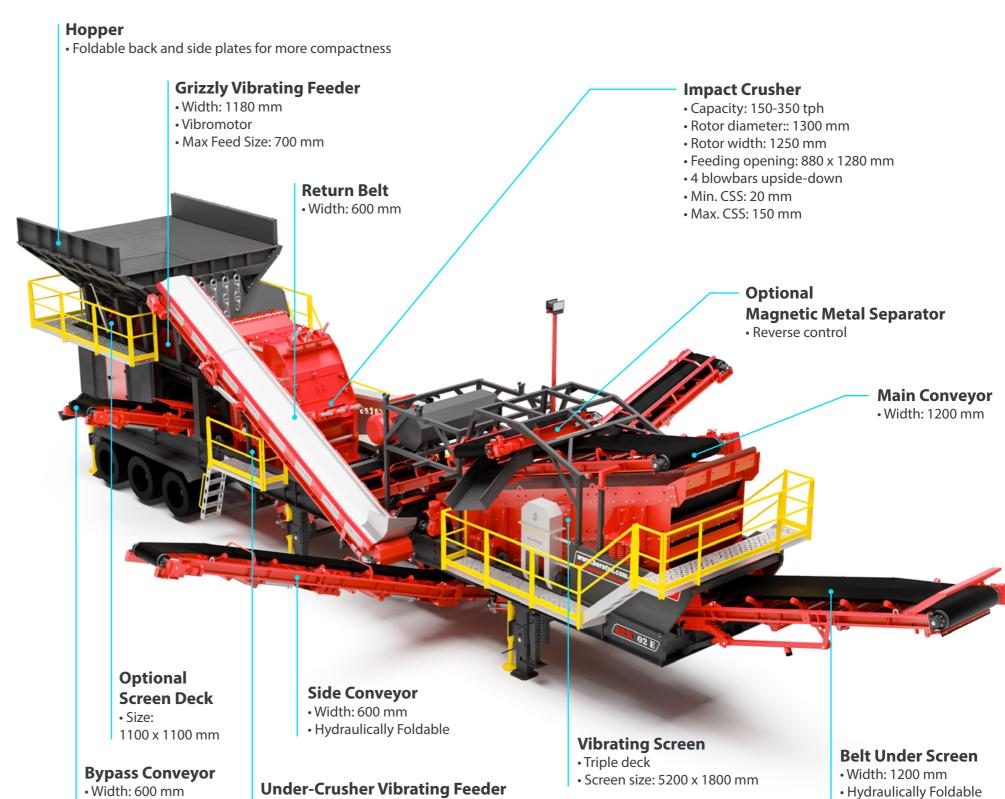

# **Technical Specifications**

- PDK series high-capacity impact crusher
- 3-deck vibrating screen
- Bypass chute and hydraulic folding conveyor
- Hydraulic folding rear and side covers
- Wireless remote control
- PLC control system
- Electric operation
- Grizzly vibrating feeder
- Dust reduction system

# **Optional Features**

- Metal separator magnet
- Hardox linear bunker
- Automatic lubrication system

# Easy plug-in PLC-based system with an LCD touch screen

# Electrical Power
